SYMBOLOGY CONFIGURATION MANAGEMENT CHANGE PROPOSAL FORM			
CHANGE PROPOSAL NUMBER		**MIL00-23B**	
ORIGINATOR	**SPONSOR**	**DATE RECEIVED**	**DATE OF ACTION**
PM FATDS	**ARMY**	**1 September 2000**	**August 23, 2001**
CHANGE PROPOSAL TITLE			
ADD NEW SYMBOL, **NO-FIRE AREA (NFA), RECTANGULAR**			
SUGGESTED CHANGE			

The Army has a requirement to add a new symbol to MIL-STD-2525B.
     1. The purpose of the Rectangular No-Fire Area symbol is to graphically display rectangular No-Fire Areas (NFA) to commanders in the Common Operational Picture (COP)/Common Tactical Picture (CTP).
     2. Recommend adding to hierarchy item 2.X.4, Fire Support, under the "Areas", "Command and Control Areas" hierarchy, 2.X.4.3.2, figure B-17, and table B-IV.

OVERVIEW

Currently, the standard does not a contain symbol depicting rectangular No-Fire Areas. In general, the rectangular No-Fire Area (NFA) symbol is used to graphically display a land area designated by the appropriate commander into which fires of their effects are prohibited. Incorporation into MIL STD 2525B, which will be used in JMTK and GSD, will allow the symbol to be transmitted/received by all battlefield systems. The rectangular No-Fire Area is a required symbol in the COP/CTP to be shared across the battlefield. The development of the COP/CTP is required of all ABCS component systems. Fire Support systems are the producer of the rectangular No-Fire Area for the COP/CTP. Fire Support systems will retain this capability for fielding throughout the Army and USMC.

OPERATIONAL DESCRIPTION

The purpose of the rectangular No-Fire Area symbol is to graphically display to commanders and operators a land area designated by the appropriate commander into which fires of their effects are prohibited. The rectangular No-Fire Areas are unique to specific weapons and units. Two (2) point locations and a width are required to graphically display a rectangular No-Fire Area. The minimum information required to interoperate with another system is defined below.

IMPLEMENTATION

Description: **Fire Support, Areas, Command and Control Areas, No-Fire Area (NFA), Rectangular**

Parameters:
1. Anchor Points. This graphic requires two anchor points and a width, defined in meters, to define the boundary of the area. Points 1 and 2 will be located in the center of two opposing sides of the rectangle.

2. Size/Shape. Size: As determined by the anchor points. The anchor points determine the length of the rectangle. The width, defined in meters, will determine the width of the rectangle. Shape: Rectangle. The information fields should be moveable and scaleable.

3.Orientation. As determined by the anchor points.

Fixed/Dynamic: Dynamic

Hierarchy: 2.X.4.3.2.4.2

Symbol ID: G*F*ACNR--****X

DECISION NOTICE

SSMC 3-01: Approved as amended. MIL00-23A amended by adding text to point out that width will be defined in meters. See parameters and graphic example above and the example of Table B-IV in attachment A.

Attachment A to MIL00-23B, Add New Symbol, No-Fire Area (NFA), Rectangular

Tasks:
1. Modify Figure B-17 to reflect new hierarchy structure (Figure B-17 becomes Figures B-17.1 and B-17.2) and addition of new Fire Support graphics.

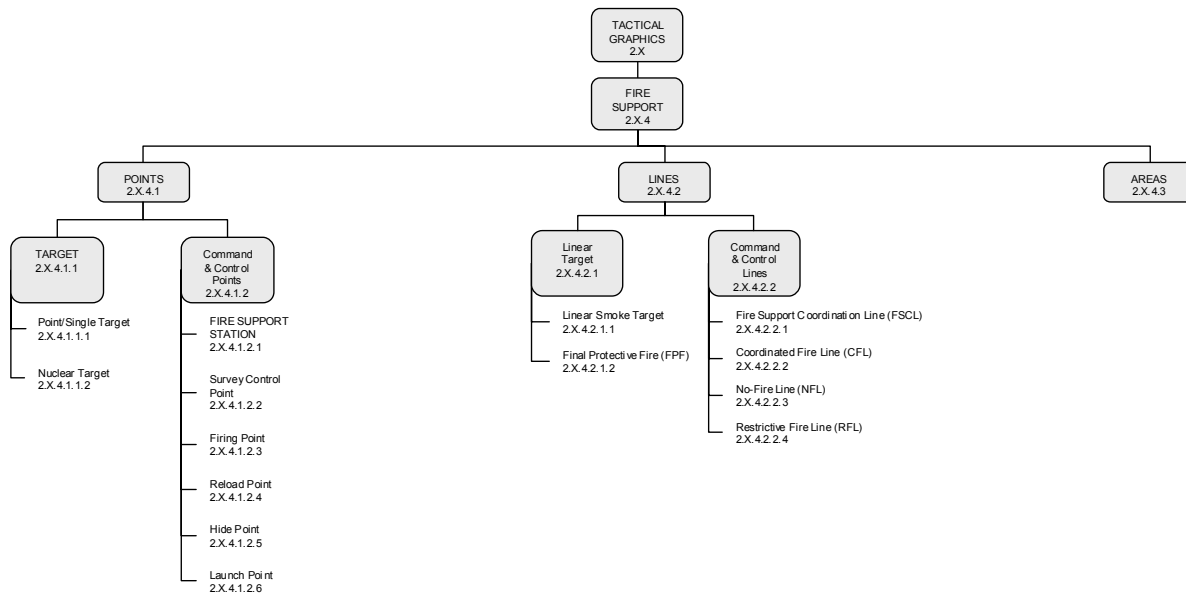

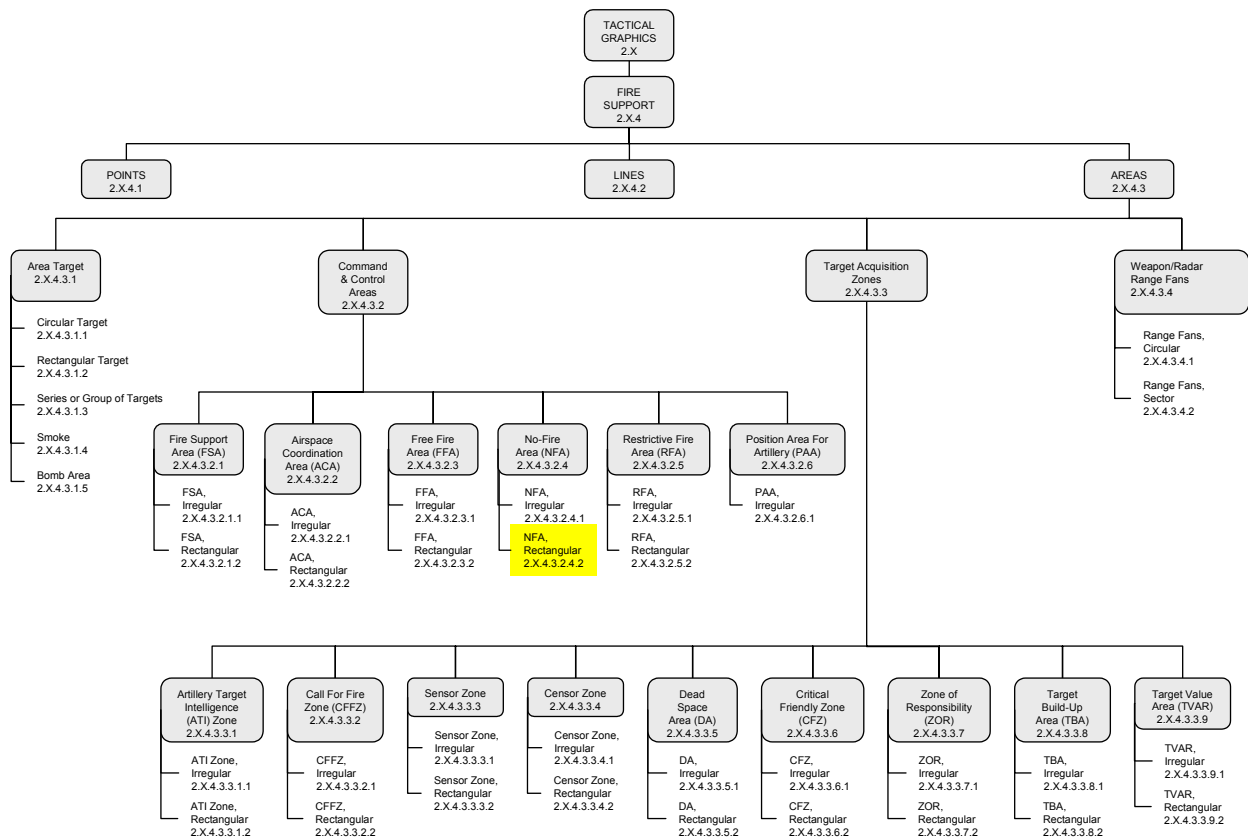

Figure B-17.1. Fire Support.

Figure B-17.2. Fire support.

Attachment A to MIL00-23B, Add New Symbol, No-Fire Area (NFA), Rectangular

2. Modify Table B-III to reflect restructured hierarchy numbers, provide new symbol IDs for restructured graphics and addition of new graphics' hierarchy numbers and symbol IDs.
